

We recently added the 10-33 Foundation's Pre-Incident Stress Awareness Training to our CIT Academy. It immediately became one of the most favored and well- received presentations. I have since had the Foundation return for two more Academies and the presentation keeps improving because they earnestly strive to provide relevant and useful information to first responders that might ultimately help save their lives. Based on the feedback of over 150 officers they trained in our department over the past two years, I know the 10-33 Foundation is positively impacting the Law Enforcement community. I cannot adequately express my gratitude for all they do.
